FOR YOUR ON-HIGHWAY

SPECIALTY TRAILER

H INTRAAX®

AANLS 20K

Hendrickson brings suspension integration to autohaulers, moving vans and drop-frames

The AANLS 20K extends all of the durability, low-maintenance and low-weight advantages of INTRAAX® to trailers requiring a highly compact, low-ride-height suspension system.

The AANLS gives operators of autohaulers, moving vans and drop-frame trailers the exceptional freight protection, superior performance and operating efficiencies that have made INTRAAX the recognized leader in quality and the most popular air-ride suspension on the market.

By drawing on patented INTRAAX tapered-beam technology and unmatched design experience, the AANLS 20K delivers an air-ride package more than 120 pounds per axle lighter than comparable suspensions.

Available in ride heights from 6.25 to 12 inches, this 20,000-pound capacity system features shortened trailing arms providing a compact profile ideally suited to the tight confines of autohauler and drop-frame trailer designs.

The system offers a choice of 15-inch brakes needed for 19.5-inch tires or the conventional 16.5-inch brake configuration used with 22.5- and 24.5-inch tires. AANLS also provides all of the benefits of INTRAAX, including the industry's first standard Cam Tube System™ to reduce S-cam maintenance and the industry's straightest axle to help stretch fuel mileage and tire life.

For The Road Ahead™

H HENDRICKSON

What could the lightweight, compact AANLS 20K do for your bottom line?

The industry's first integrated suspension-axle-brake system, INTRAAX® provides a rigid axle/ beam connection combined with the proven TRI-FUNCTIONAL® Bushing, resulting in an ideal combination of ride softness and stability.

Hendrickson has demonstrated the advantages of the tapered-beam INTRAAX design with literally millions of service miles on major highways throughout North America. Drawing on proven technology that made our VANTRAAX® slider the first choice of van operators, the AANLS 20K

weighs in as the lightest air-ride system in its class. That weight savings can translate to greater payload and help improve fuel economy to boost your bottom line.

INTRAAX benefits:

- **Low maintenance for the road ahead**

- Maintenance requirements minimized — no re-torque requirements; fewer wear items
- Proven TRI-FUNCTIONAL Bushing technology for a smooth ride and exceptional control
- QUIK-ALIGN® for fast, convenient axle alignment
- Rigid trailing arm, solid axle connection independently proven to be the most stable design
- Industry's first standard Cam Tube System™ to extend brake component life
- Single source for technical support, training and warranty

- **Responsive, consistent braking power**

- Improved brake geometry for enhanced efficiency and performance
- Up to a half-inch less stroke required

- **Superior axle**

- The industry's straightest axle helps increase fuel economy and tire life
- Patented axle wrap for optimum structural integrity and 10-year/1 million-mile axle connection limited warranty

- **Wide range of READY-TO-ROLL® (RTR®) wheel-end options**

- Hendrickson Unitized System (HUS®) features a 7-year limited on-highway warranty
- Hendrickson Long-life System™ (HLS™) features a 5-year limited on-highway warranty

- **Customize to meet your needs**

- Tune your system with a choice of forward- or rear-mounted, extended-service high-damping shock absorbers to optimize ride control for your specific operation
- TIREMAAX® Tire Inflation System works automatically to help protect your trailer from the costs and operating problems associated with under-inflated tires
- Both 15- and 16.5-inch brake options for compatibility with a variety of tire sizes

For additional information on the INTRAAX AANLS 20K, contact your trailer dealer or a Hendrickson sales representative at 1-866-RIDEAIR (743-3247).
