

INTRAAX® - SP

Platform Slider Series
AAZNT 23K • 46K
AAZL 23K • 46K

INTRAAX® top-mount and low-ride platform sliders deliver unprecedented weight savings and low-maintenance advantages

Drawing on patented INTRAAX® technology and unmatched slider box design experience, Hendrickson's platform slider systems equip operators with durable and low maintenance air suspension packages. This lightweight system weighs substantially less than other systems — as much as 800 pounds less than other tandem air suspension sliders and up to 100 pounds less than mechanical sliders. In addition, the AAZNT is standard with large-diameter axles (LDA™), so fleets can move even more cargo on each haul. AAZ sliders give operators of both platform and drop-deck trailers that use sliders the advantages of INTRAAX that haulers have enjoyed for a decade.

The AAZ features a combination of a smooth-sliding box and the road-proven INTRAAX suspension system. The "Z-rail" slider box fits neatly between trailer I-beams with lock-pins engaging through holes in the web of the beams. While slashing weight allows haulers to carry more cargo on each run, the INTRAAX system maintains superior performance and rugged durability along with a smooth ride that has made it the highest quality and most popular air suspension in the market.

Move more cargo, protect your trailer and increase your payload with INTRAAX-SP platform sliders.

 **HENDRICKSON**
The World Rides On Us®

Platform sliders offer significant weight savings for flatbed and drop-deck trailers

INTRAAX®-SP platform sliders bring operators weight savings and the full range of benefits of advanced integrated suspension technology.

The extremely lightweight, top-mount and low-ride platform slider systems incorporate all of the features of INTRAAX. This includes the industry's first standard trailer Cam Tube System™, which enhances S-cam alignment and extends cam and brake bushing life, and Hendrickson's exceptionally straight axle that helps improve tire life and fuel economy.

Finger-tip operation of the QUIK-DRAW® air-actuated, pin-pull mechanism provides driver-friendly slider repositioning and enhances safety.

INTRAAX-SP Platform Slider Specifications

		AAZNT 23K	AAZNT 46K	AAZL 23K	AAZL 46K
System Capacity		23,000 lbs.	46,000 lbs.	23,000 lbs.	46,000 lbs.
Axle	Arrangement	Single	Tandem	Single	Tandem
	Spacing	N/A	49, 60 or 72 inch	N/A	49, 60 or 72 inch
	Track	71.5 or 77.5 inch		71.5 or 77.5 inch	
I-Beam Compatibility		37, 38, 43 or 44 inch centers		37, 38, 43 or 44 inch centers	
Ride Heights		13.5 to 17 inch		6.5 to 12 inch	
Suspension		INTRAAX tapered beam AANT 23K		INTRAAX low-ride AAL 23K	
Pin-pull Mechanism		QUIK-DRAW		QUIK-DRAW	

INTRAAX Benefits:

- **Low maintenance**
 - Maintenance requirements minimized
 - Proven TRI-FUNCTIONAL® Bushing technology for exceptional ride and control
 - QUIK-ALIGN® for fast, convenient axle realignment
 - Rigid trailing arm, solid axle connection proven to be the most stable design
 - Single source for technical support, training and warranty
- **Responsive, consistent braking power**
 - Industry's first standard Cam Tube System extends brake component life
 - Up to a half-inch less stroke required
- **Superior axle**
 - Straightest axle in the industry helps increase fuel economy and tire life
 - Patented axle wrap for optimal structural integrity
- **Wide range of wheel-end options**
 - Hendrickson Extended-Life 7-year System™ (HXL7®) provides a seven-year limited warranty
 - Hendrickson Long-life System™ (HLS®) uses semi-fluid grease and comes with a five-year limited warranty
 - Hendrickson Valve System™ (HVS®) provides a three-year limited warranty
